

# MD. MOORSAHAUL ISLAM NOOR

Full-Stack Developer (MERN / Next.js)

Dhaka, Bangladesh | +8801913540968 | mursahaulnur17@gmail.com

[LinkedIn](#) | [GitHub](#) | [LeetCode](#) | [Portfolio](#)

## CAREER OBJECTIVE

Full-stack developer specializing in the MERN stack, Next.js, and TypeScript, with hands-on experience building and deploying production web applications end-to-end — from role-based authentication systems to REST APIs and payment integrations. Comfortable owning a feature from database schema to deployed UI. Currently deepening Data Structures & Algorithms and System Design fundamentals. Seeking a full-stack developer role, local or remote, on a collaborative engineering team.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3

**Frontend:** React, Next.js (App Router), Tailwind CSS, HeroUI, DaisyUI, Responsive Design

**Backend:** Node.js, Express.js, RESTful API Design, JWT, Better Auth, Role-Based Access Control (RBAC)

**Database:** MongoDB, MongoDB Atlas, Mongoose ODM, CRUD Operations, Schema Design

**Integrations:** Stripe Payments, Recharts, Service Workers / Browser Notifications, node-cron

**DevOps & Tools:** Git, GitHub, Vercel, Render, npm, VS Code, Postman

**Currently Learning:** Data Structures & Algorithms, System Design Fundamentals, Advanced Next.js

## PROJECT EXPERIENCE

### MedTrack — Medication Adherence Tracking Platform

2026

**Tech Stack:** Next.js, TypeScript, Express.js, MongoDB, Mongoose, Better Auth, Tailwind CSS | [Live Demo](#) | [GitHub](#)

- Designed and built a full-stack medication management platform with two role-based experiences: patients tracking their own doses and caregivers monitoring linked patients read-only.
- Implemented automated dose scheduling with node-cron and a 30-minute pre-dose grace window, plus adherence history with date-range filtering.
- Built browser push notifications via Service Worker to remind patients of upcoming doses in real time.
- Developed a caregiver invite/link flow and secured all routes with Better Auth session-based authentication.
- Architected a RESTful API layer in Express.js/TypeScript backed by MongoDB and Mongoose, deployed independently from the frontend (Vercel + Render) with cross-origin session handling.

### MediCare Connect — Hospital Appointment Management System

2026

**Tech Stack:** Next.js, Express.js, MongoDB, Stripe, Better Auth, Tailwind CSS, Recharts | [Live Demo](#) | [GitHub](#)

- Built a full-stack healthcare platform connecting patients, doctors, and administrators through three distinct role-based dashboards.
- Implemented doctor verification, appointment booking with schedule/availability management, and search by name or specialization.
- Integrated Stripe Checkout for secure online payments and built an admin analytics dashboard using Recharts.
- Secured all protected routes with JWT and Better Auth, with server-side data fetching for real-time accuracy.

### Portfolio Website

2026

**Tech Stack:** React, Next.js, Tailwind CSS | [Live Demo](#) | [GitHub](#)

- Designed and developed a fully responsive personal portfolio showcasing projects, technical skills, and certifications, optimized for performance across devices.

## EDUCATION

### Bachelor of Science (B.Sc.) in Software Engineering

Daffodil International University — Graduated 2025

Concentration: Cybersecurity (self-directed study — TryHackMe, HackTheBox, TCM Security)

## LANGUAGES

Bangla (Native) | English (Professional Working Proficiency)
